

ASSESSMENT BRIEF 2

COURSE: Bachelor of Information Technology/Bachelor of Information Technology with a Specialisation in Cyber Security	
Unit:	Capstone Project
Unit Code:	CPRO306
Type of Assessment:	Formative Assessment
Length/Duration:	2 Pages
Unit Learning Outcomes addressed:	1. Critically analyse methods and techniques for applying IT at the corporate level. 2. Identify and present requirements for an information system to solve a business problem in a large, complex organisation. 3. Design, develop, test & evaluate an appropriate systems solution, incorporating ethical requirements and acceptance criteria. 4. Identify and resolve critical technical issues with minimal supervision. 5. Critically reflect on approaches and team performance in delivering an applied project. 6. Evaluate project process and outcomes—including team management—against the project proposal.
Submission Date:	Week 3
Assessment Task:	Interim SRS Report
Total Mark:	100
Weighting:	5%

Students are advised that **submission of an Assessment Task past the due date without a formally signed approved Assignment Extension Form** (Kent Website [MyKent Student Link](#)> *FORM – Assignment Extension Application Form – Student Login Required*) **or previously approved application for other extenuating circumstances impacting course of study, incurs a 5% penalty per calendar day,**

calculated by deduction from the total mark.

For example. An Assessment Task marked out of 40 will incur a 2 mark penalty for each calendar day.

More information, please refer to (Kent Website [MyKent Student Link](#)> *POLICY – Assessment Policy & Procedures – Student Login Required*)

ASSESSMENT DESCRIPTION:

To complete this part of the assessment student needs to form a group comprising of 4 to 5 students maximum. After the group formation done, they need to identify a project and needs to create a project initiation report. In this report they need to describe their project background, problems statement, finance possibilities, feasibility of the project and the name of the group. The report also needs to include the following:

- General description of the project including the details of the project, stakeholders, required project team, purpose and objectives of the project.
- An updated scope statement, including more detailed descriptions of key deliverables
- Project milestones, major risks, communication
- Identify ethical risks in database design and implement the actions of mitigation.
- Feasibility study
- Your responses on the feedback from your Lecturer.

To demonstrate the **individual and the group work**, during the iteration, each team member should work on their assigned work items, communicating, and cooperating. At the end of the iteration, each team member should commit whatever they have achieved to version control, regardless of its state of completion. At the end of the iteration, the team should review their work and record what progress has been made against the objectives of the iteration.

Note: a sample of project initiation or project charter is provided in the student's resources folder as a guide for you to follow.

MARKING GUIDE (RUBRIC): FOR GROUP ASSIGNMENT

Marking Criteria	Fail (0-49% of the criterion mark)	Pass (50-64% of the criterion mark)	Credit (65-74% of the criterion mark)	Distinction (75-84% of the criterion mark)	High Distinction (85-100% of the criterion mark)
Criterion-1 (10 mark) Assess the Individual and Group Work	The students have not posted links to the forum to the relevant versions of iteration plans and reports as detailed in the assessment description to show the individual and group work.	The students posted links to the forum to the relevant few versions of iteration plans and reports as detailed in the assessment description to show the individual and group work.	The students posted links to the forum to the relevant some versions of iteration plans and reports as detailed in the assessment description to show the individual and group work.	The students posted links to the forum to the relevant almost all versions of iteration plans and reports as detailed in the assessment description to show the individual and group work.	The students posted links to the forum to the relevant all versions of iteration plans and reports as detailed in the assessment description to show the individual and group work.

Criterion-2 (20 mark) Project Description	Missing project description, objectives or details of stakeholders	Short description of the project including the details of the project, stakeholders, required project team, purpose and objectives of the project is provided	Description of the project including the details of the project, stakeholders, required project team is provided. But the purpose and objectives of the project are not clearly defined.	Description of the project including the details of the project, stakeholders, required project team is provided. Purpose and objectives of the project are defined with few errors.	Clear and specific description of the project including the details of the project, stakeholders, required project team, purpose and objectives of the project is provided
Criterion-3 (5 mark) Group cohesiveness	No response on the feedback from the Lecturer	Responses are provided on few feedbacks from your Lecturer.	Responses are provided to some feedbacks from your Lecturer.	Responses are provided on almost all the feedbacks from your Lecturer.	Responses are provided on all the feedbacks from your Lecturer.
Criterion-4 (20 marks) Key deliverables	Not updated scope statement	Little update is done for scope statement, including little descriptions of key deliverables	Scope statement has some updates, including few descriptions of key deliverables	Almost all scope statement has been updated, including more descriptions of key deliverables	All Scope statement has been updated, including more descriptions of key deliverables
Criterion-5 (20 marks) Demonstrates the ability to analyzing problems and well-justified recommendations	No attempt for Project milestones, major risks, communication No attempt in identifying and mitigating ethical risks in database design	Minor attempt for general Project milestones, major risks, communication Minor attempt in identifying and mitigating ethical risks in database design	General Project milestones, major risks, communication have been attempted Some attempt in identifying and mitigating ethical risks in database design	Specific Project milestones, major risks, communication have been written Most evidence provided in identifying and mitigating ethical risks in database design	Specific and comprehensive Project milestones, major risks, communication have been written Adequate and clear evidence provided in identifying and mitigating ethical risks in database design
Criterion-6 (20 marks) Feasibility Study	No Feasibility study is done	Little attempt for General Feasibility study	General Feasibility study has been done.	Specific Feasibility study has been done	Specific and comprehensive Feasibility study has been done
Criterion-7 (5 marks) Individual Contribution (evaluated individually via the allocated tasks completed)	Work is incomplete, inaccurate, or does not meet basic assessment task requirements. Failing to achieve these 5 marks will result in an overall assessment failure.	Produces work that meets minimum requirements with frequent errors or gaps in quality.	Completes work to a satisfactory standard with occasional minor errors; meets project requirements.	Consistently delivers high-quality work with attention to detail, exceeding project requirements.	Produces outstanding, meticulous work that surpasses project expectations and contributes to project excellence.
*Workload Distribution (no marks assigned, only weight indicated)	If a student's contribution is below 20%, they will receive an F for this assessment task. The final mark	If a student's contribution is between 20%-25%, they will receive an P or lower for this task. The final mark awarded will be either the actual group assignment mark or 64, whichever is lower.	For contributions of 25% or higher, the group assignment mark will be awarded as is.		

	awarded will be either the actual group assignment mark or 49, whichever is lower.		
--	--	--	--

ASSESSMENT SUBMISSION

A written assignment undertaken in groups of three or four students in the form of a report addressing a selected topic related to abovementioned project. This assessment is a group project/activity and students are required to work with their respective groups. No individual submission will be accepted. You will not receive any marks for this assignment if your group members collectively report against you for non-participation or non-cooperation. You have to nominate someone as your group leader to coordinate the assignment submission. Only one submission is accepted for each group.

The assignment must be submitted online in Moodle. All materials MUST be submitted electronically in Microsoft Word format. Other formats (e.g., pdf or MAC file) may not be readable by markers. Please be aware that any assessments submitted in other formats will be considered LATE and will lose marks until it is presented in MS Word. No paper based or hardcopy submission will be accepted.

Our Academic Learning Support (ALS) team would be happy to help you with understanding the task and all other assessment-related matters. For assistance and to book one-on-one meeting please email one of our ALS coordinators (Sydney ALS_SYD@kent.edu.au; Melbourne ALS_MELB@kent.edu.au). For online help and support please click the following link and navigate Academic Learning Support in Moodle.

<http://moodle.kent.edu.au/kentmoodle/course/view.php?id=5>

GENERAL NOTES FOR ASSESSMENT TASKS

Content for Assessment Task papers should incorporate a formal introduction, main points and conclusion.

Appropriate academic writing and referencing are inevitable academic skills that you must develop and demonstrate in work being presented for assessment. The content of high quality work presented by a student must be fully referenced within-text citations and a Reference List at the end. Kent strongly recommends you refer to the Academic Learning Support Workshop materials available on the Kent Learning Management System (Moodle). For details please click the link <http://moodle.kent.edu.au/kentmoodle/mod/folder/view.php?id=3606> and download the file titled "Harvard Referencing Workbook". This Moodle Site is the location for Workbooks and information that are presented to Kent Students in the ALS Workshops conducted at the beginning of each Trimester.

Kent recommends a minimum of **FIVE (5)** references in work being presented for assessment. Unless otherwise specifically instructed by your Lecturer or as detailed in the Unit Outline for the specific Assessment Task, any paper with less than five (5) references may be deemed not meeting a satisfactory standard and possibly be failed.

Content in Assessment tasks that includes sources that are not properly referenced according to the "*Harvard Referencing Workbook*" will be penalised.

Marks will be deducted for failure to adhere to the word count if this is specifically stated for the Assessment Task in the Unit Outline. As a general rule there is an allowable discretionary variance to the word count in that it is generally accepted that a student may go over or under by 10% than the stated length. Students are not allowed to use AI tools for the preparation of their submissions.

Use of generative artificial intelligence tools are not permitted to be used for this assessment. Please respect this and be aware that where unauthorized use is detected, it will be considered as academic misconduct and penalties will apply.

GENERAL NOTES FOR REFERENCING

References are assessed for their quality. Students should draw on quality academic sources, such as books, chapters from edited books, journals etc. The textbook for the Unit of study can be used as a reference, but not the Lecturer Notes. The Assessor will want to see evidence that a student is capable of conducting their own research. Also, in order to help Assessors determine a student's understanding of the work they cite, all in-text references (not just direct quotes) must include the specific page number(s) if shown in the original. Before preparing your Assessment Task or own contribution, please review this 'YouTube' video (Avoiding Plagiarism through Referencing) by clicking on the following link: link:

<http://moodle.kent.edu.au/kentmoodle/mod/folder/view.php?id=3606>

A search for peer-reviewed journal articles may also assist students. These type of journal articles can be located in the online journal databases and can be accessed from the Kent Library homepage. Wikipedia, online dictionaries and online encyclopaedias are acceptable as a starting point to gain knowledge about a topic, but should not be over-used – these should constitute no more than 10% of your total list of references/sources. Additional information and literature can be used where these are produced by legitimate sources, such as government departments, research institutes such as the National Health and Medical Research Council (NHMRC), or international organisations such as the World Health Organisation (WHO). Legitimate organisations and government departments produce peer reviewed reports and articles and are therefore very useful and mostly very current. The content of the following link explains why it is not acceptable to use non-peer reviewed websites (Why can't I just Google?): <https://www.youtube.com/watch?v=N39mnu1Pkgw>
_ (thank you to La Trobe University for access to this video).

Student guide to using generative AI

Generative AI tools cannot be used for any assessments in this unit. In this unit, you must not use generative artificial intelligence (AI) to generate any materials or content in relation to your assessment. If you use AI to write your assessment: the value of the assessment would be diminished; you may not develop the required skills for your future studies or career; and you would be breaching academic integrity which may constitute academic misconduct.
